Hyderabad

Summary

Self-starter, team player with product development skills in startup environment, agile teams

Work experience

Epiq global **(Feb'24 - Present)** Hyderabad

Senior software engineer

-Optimized dataset archival in S3 using custom ZIP64 streaming, achieving a 50%+ reduction in processing time
-Implemented **parallel worker zip creation** to improve archive generation performance for larger files
-Contributed to architectural blueprints, technical design and development of user-facing features
-Diagnosed and resolved database bottlenecks using runtime execution plans
-Adopted GitHub Copilot for code analysis and identifying edge-case bugs early
-Implemented, delivered end to end product features using react, java, python, opensearch, mysql, aws
-Provided technical guidance to team mates whenever necessary

Vmware **(Feb'21 - Dec'23)** Bangalore

Full stack developer

-Lead a team of 8 software engineers in design**(HLD,LLD)** and implementation of Functional (frontend,backend features) and non-functional requirements in a Saas product
-Implemented a **bot interface** (in slack,msteams) with high usage product features which contributed to increase in traffic and **ease of access** via mobile
-**Implemented Login with SSO** feature in product, frontend (angular) and backend(spring boot), handled access restriction for authorized and unauthorized page views
-Optmized docker image creation process using **multi-stage build** which reduced time taken to build, deploy microservices
-Implemented GITLAB CI / CD workflow for microservices build and deployment
-**Mentored** team members and provided technical guidance

Insuredmine Inc **(Dec'19 - Nov'20)** Bangalore

Lead Engineer

-Integrated two way data flow between **zapier** and product
-Migration
  Mongodb instance from standalone instance (single node) to a **replica-set** with 3 nodes to handle **high volume of read requests**

Apache httpd to **nginx** in all VM's which improved over all application response time through **response compression**
-Implemented Bulk email feature using **AWS SES**, Agenda npm package
-Developed product features using Angular, Nodejs, Mongodb, AWS
-Implemented CI/CD pipeline using Jenkins
-Migrated the Microservices from hosting in AWS EC2 to AWS ECS and **AWS Fargate**

▶ Infosys Limited **(Dec'14 - Nov'19)** Chennai & Bangalore

Technology Analyst
-Engineered secure API integrations to facilitate payment transfer flows between third-party applications and the core banking product, ensuring strict data encryption standards
-Worked with **XML based database** (Marklogic) for efficient search and storage of documents
-Hands-on with Angular,Nodejs, Java, Spring Boot, Mysql

Senior systems engineer
-Implemented 'add to cart' workflow, 'order placement' workflow for a **Ecommerce product** using Magento Framework (PHP),Mysql

▶ Cognizant **(Aug'12 - Dec'14)** Chennai

Programmer Analyst
-Responsible for L2 technical support
-Fixed issues in Batch processing system developed using Mainframe and Java
-Worked in a 24/7 Production support team

Skills

Java | Spring Boot | Javascript | Nodejs | React | Rdbms | Nosql (Mongo, opensearch) | Redis | Rabbit MQ | Docker/Podman | Kubernetes | System design and development | AWS

Certification

CKAD : Certified Kubernetes Application Developer
Issued on 18Aug'23 - Expired on 18Aug'26

Education

- Bachelor of Engineering - Computer Science
  Mepco Schlenk Engineering College
  2008 - 2012 Virudhunagar
